

Brandon Startz

A versatile developer with strong multidisciplinary skills and hands-on experience. Grounded in user research, with excellent communication skills and a user-centric twist.

Work Experience

AI Developer Training

Playful Pixels Oy, Helsinki, Finland

March 2025 - Ongoing

- Building frontend for GenAI assistant platform; learning systems for model routing and multimodal agent blending
- Gaining exposure to integrating cutting-edge models with an architecture that routes queries to the most effective LLM or image generator

Lead Game Developer and User Researcher

Music Fairy Tales Oy, Helsinki, Finland

February 2023 - December 2023

- Led Unity development of a serious game for children; integrated analytics to inform design
- Ran user research with children and domain experts (psychologists); methods included observational studies, interviews, and surveys

Player Analyst

HypeHype Inc., Helsinki, Finland

November 2021 - December 2022

- Built and deployed an NLP tool for automated playtest analysis using sentiment classification
- Conducted mixed-methods user research, guided user-focused design, and presented team-wide research reports

Research Assistant

Helsinki & Aalto University, Finland (2018-2021)

- Evaluated emotional UX (EEG, eye-tracking) in HCI studies (HIIT Lab)
- Prototyped interactive IoT systems for smart campus experiences (UbiKampus)
- Conducted literature review on player motivation (Aalto Games Lab)

Education

Masters of Arts in Video Game Design and Production

Aalto University, 2020-2022

Thesis: NLP-based tool for automating emotional playtest analysis (Eximia cum laude)

Focus: Serious games, user research, game programming

Bachelor of Science in Psychology

Bachelor of Arts in Spanish Language

Minor: Cognitive Science

Oklahoma State University, 2012-2018

Multi-year lab research on attention, learning, anxiety & depression using behavioral and physiological methods

GPA: 3.72/4
